Description

JBL Tune 305C USB-C Earphones The JBL Tune 305C USB-C Earphones are designed for users who want reliable wired audio with clear sound, deep bass, and simple USB-C connectivity. With Hi-Res Audio support and JBL Pure Bass Sound, they are a practical choice for music, calls, videos, gaming, and everyday listening. Their main value is plug-and-play convenience. The USB-C connection works with many compatible phones, tablets, laptops, PCs, and gaming devices, while the 3-button remote and built-in microphone make music control and calls easy. Key Features Wired USB-C Earphones JBL Pure Bass Sound Hi-Res Audio certified Clear and detailed sound Deep and powerful bass USB-C connectivity Compatible with many USB-C devices 3-button remote control Built-in microphone Music playback control Volume adjustment Call answering support EQ presets control Suitable for music, calls, videos, gaming, and daily use Main Feature Sections JBL Pure Bass Sound The JBL Tune 305C delivers deep and powerful bass, giving music, videos, and games a stronger audio experience. Hi-Res Audio Support Hi-Res Audio certification helps provide clearer and more detailed sound quality with a wider frequency range. USB-C Connectivity The USB-C connection makes the earbuds suitable for many modern phones, tablets, laptops, PCs, and gaming devices. Device compatibility should be checked before use. 3-Button Remote with Microphone The in-line remote allows users to control music playback, adjust volume, manage EQ presets, and answer calls easily. The built-in microphone supports voice calls and online communication.
