Product	Hoco DV15 Tri-Channel Dash Cam
SKU	cm-DV15
Brand	Hoco
Category	Car Electronics
Minimum order quantity	1
Unit	—
Unit price	$45.00
Available quantity	100

Description

Hoco DV15 Tri-Channel Driving Recorder The Hoco DV15 Tri-Channel Driving Recorder is designed for drivers who want front, interior, and rear recording in one compact dash cam system. It is useful for daily driving, taxi use, ride-hailing, delivery drivers, family cars, and anyone who wants extra video coverage around the vehicle. Its strongest selling point is the three-camera setup at a practical price point. With front, cabin, and rear recording, a 2-inch IPS display, loop recording, sound recording, HD night vision, Wi-Fi app support, and a windshield mount, the Hoco DV15 gives drivers a simple way to record important moments on the road. Key Features Tri-channel driving recorder Front, interior, and rear camera recording 2-inch IPS HD display Front camera records 720p at 30fps Interior camera records 480p at 30fps Rear camera records 480p at 30fps Front 140° wide-angle view Interior 90° view Rear 90° view HD night vision Loop recording Sound recording Wi-Fi support App functions supported Supports Class 10 TF card up to 128GB Windshield mount included 3.5m main cable length Rear camera with 5.5m cable Supports 22 languages Compact 98 × 46 × 42mm body Lightweight 65g design Main Feature Sections Tri-Channel Recording The Hoco DV15 records from three directions: front, interior, and rear. This gives drivers broader coverage compared to a single-camera dash cam, helping capture road conditions, cabin activity, and rear-view footage. Front 720p Camera The front camera records at 720p resolution with 30fps video. Its 140° viewing angle helps capture a wider view of the road ahead, making it useful for daily driving and general road recording. Interior and Rear Recording The interior and rear cameras record at 480p resolution with 30fps video. The interior camera is useful for cabin monitoring, while the rear camera adds extra visibility behind the vehicle. 2-Inch IPS Display The built-in 2-inch IPS display allows users to check the camera view and settings directly from the device. The 320 × 240 screen gives a simple way to review basic recording status without relying only on the app. HD Night Vision HD night vision helps improve visibility in lower-light driving conditions. This is useful for night driving, parking areas, and darker roads, although actual clarity depends on lighting and installation angle. Loop Recording Loop recording allows the dash cam to keep recording continuously by overwriting older footage when the memory card becomes full. This helps maintain ongoing recording without needing to manually clear the card every time. Sound Recording The Hoco DV15 supports sound recording, allowing the dash cam to record audio together with video. This can help capture additional context during driving or incidents. Wi-Fi and App Support Wi-Fi and app functions are supported, allowing users to connect through a compatible app for easier access to recordings and settings depending on the app features available. TF Card Storage The dash cam supports Class 10 TF cards up to 128GB. The memory card is not included, so users need to purchase a compatible TF card separately. Windshield Mount Installation The included windshield mount helps position the camera on the car windshield. The 3.5m cable and 5.5m rear camera cable provide installation flexibility for most car setups. Technical Specifications Product Name: Hoco DV15 Tri-Channel Driving Recorder Product Type: Car dash cam Main Control Chip: JR3291 Channels: Front, interior, rear Front Sensor: 1MP Interior Sensor: 0.3MP Rear Sensor: 0.3MP Front Video Resolution: 720p, 1280 × 720 pixels, 30fps Interior Video Resolution: 480p, 640 × 480 pixels, 30fps Rear Video Resolution: 480p, 640 × 480 pixels, 30fps Front Lens Angle: 140° Interior Lens Angle: 90° Rear Lens Angle: 90° Display: 2-inch IPS HD display Display Resolution: 320 × 240 pixels Battery Capacity: 150mAh Memory Card Support: TF card, Class 10, up to 128GB Memory Card Included: No Wi-Fi: Supported App Functions: Supported Mount Type: Car windshield mount Night Vision: HD night vision Recording Features: Loop recording, sound recording Main Cable Length: 3.5m Rear Camera Cable Length: 5.5m Product Size: 98 × 46 × 42mm Product Weight: 65g Supported Languages: Chinese, English, Russian, Arabic, Vietnamese, Danish, Thai, Polish, Persian, Spanish, Malay, Greek, French, Italian, German, Portuguese, Turkish, Kazakh, Romanian, Hebrew, Myanmar, Ukrainian Battery Life Battery Capacity: 150mAh The built-in battery is not intended for long cordless recording. For normal use, the dash cam should be powered through the car power connection.
