## Description

Motorcycle Camera Clamp Double Head Mount The Motorcycle Camera Clamp Double Head Mount is designed for riders, creators, and photographers who need a flexible mounting solution for cameras and accessories on round rails, handlebars, and support bars. It is suitable for motorcycle and bicycle setups, video recording, photography shooting, and mounting compatible lightweight accessories. Its strongest selling point is adjustability. With a double clamp mount and double magic socket arm design, it allows 360° rotation adjustment, helping users position their camera or accessory at the angle they need for more creative and stable shots.

**Key Features**

- Double head clamp mount design
- Updated double magic socket arm
- Supports 360° rotation adjustment
- Suitable for motorcycle and bicycle handlebars
- Works with round rails and bars
- Can support compatible photography accessories and tools
- Thickened inner wall helps increase ball head friction
- Designed to clamp firmly and reduce slipping
- Durable, anti-shock, and stable build
- Useful for photography shooting and video recording

**Main Feature Sections**

**360° Adjustable Mounting** The double magic socket arm supports 360° rotation adjustment, allowing users to position their camera or accessory at different angles. This is useful for motorcycle videos, bicycle rides, action shots, and creative filming setups.

**Double Clamp Design** The double clamp structure gives more mounting flexibility compared to a basic single clamp. It can attach to suitable round rails, bars, and handlebars, making it practical for motorcycles, bicycles, and other compatible support tubes.

**Secure Grip on Round Bars** The mount is designed for round rails and bars such as motorcycle and bicycle handlebars. The thickened inner wall helps increase friction around the ball head, improving grip and helping prevent slipping during use.

**Useful for Cameras and Accessories** This mount can be used with compatible photography and video accessories such as cameras, selfie sticks, tripods, LED lights, monitors, and other lightweight tools. For heavier accessories, load capacity should be confirmed before use.

**Durable and Stable Build** Made from quality materials, the mount is designed to be durable, anti-shock, and stable during use. This makes it practical for riding, outdoor recording, and content creation setups where stability matters.

**Technical Specifications**

Product Name: Motorcycle Camera Clamp Double Head Mount  
Product Type: Double clamp camera/accessory mount  
Arm Type: Double magic socket arm  
Adjustment: 360° rotation  
Mount Design: Double clamp mount  
Suitable Mounting Surfaces: Round rails, bars, motorcycle handlebars, bicycle handlebars  
Grip Feature: Thickened inner wall to increase ball head friction  
Stability Feature: Firm clamp design to help prevent slipping  
Material: Quality materials, exact material not specified  
Shock Resistance: Anti-shock design listed by supplier  
Suitable Uses: Photography shooting, video recording, motorcycle mounting, bicycle mounting, accessory mounting
