Product specification sheet

Product	Philips Barista Brew Espresso Machine with Grinder
SKU	cm-PSA3228
Brand	Philips
Category	Consumer Electronics
Minimum order quantity	1
Unit	—
Unit price	$1,040.00
Available quantity	100

Description

Philips Barista Brew Semi-Automatic Espresso Machine PSA3228 The Philips Barista Brew PSA3228 is designed for coffee lovers who want to create barista-style espresso, Americano, cappuccino, and latte drinks at home with more control over the brewing process. Its strongest selling point is not only the built-in grinder. The real value is the complete semi-automatic coffee workflow: dual bean container, 58mm stainless steel portafilter, calibrated tamper, PID temperature control, pre-infusion, pressure gauge, steam wand, and temperature milk jug. Key Features Semi-automatic espresso machine 280g dual bean container Aroma seal to help preserve bean freshness Built-in metal conical burr grinder 15 grind size settings Professional 58mm stainless steel portafilter Single and dual-walled filter baskets Premium calibrated stainless steel tamper PID temperature control Pre-infusion system Integrated pressure gauge Americano button Powerful steam wand 450ml temperature milk jug Countertop-safe tamping system Anti-fingerprint coated metal housing European design Coffee Grinding 280g Dual Bean Container The dual bean container lets users store and switch between different coffee beans, such as light and dark roasts, while helping preserve freshness with the aroma seal. Metal Conical Burr Grinder The built-in grinder offers 15 grind settings, giving users more control over espresso flavor and extraction. Real Buyer Benefit A finer grind can help create stronger espresso extraction, while coarser settings can be adjusted based on bean type and taste preference. Espresso Extraction 58mm Stainless Steel Portafilter The professional 58mm portafilter helps distribute water more evenly across the coffee puck, supporting better extraction and richer crema. Single & Dual-Walled Filter Baskets The included filter basket options make the machine more flexible for different user skill levels and coffee preparation styles. Tamping Control Premium Calibrated Tamper The stainless steel calibrated tamper helps apply consistent pressure and create a level coffee puck. Countertop-Safe Tamping System The portafilter includes integrated tamping rubber on the bottom, helping protect countertops during tamping. Brewing Precision PID Temperature Control PID temperature control helps maintain stable brewing temperature for more consistent espresso results. Pre-Infusion System Pre-infusion gently wets the coffee grounds before full extraction, helping reduce channeling and improve balance in the cup. Pressure Gauge The integrated pressure gauge guides users during extraction and helps show when the brewing pressure reaches the ideal range. Americano Function One-Touch Americano The dedicated Americano button makes it easier to prepare a classic Americano using the integrated hot water outlet. Milk Frothing Powerful Steam Wand The steam wand allows users to create milk foam for cappuccinos, lattes, and latte art. 450ml Temperature Milk Jug The included milk jug features a temperature strip, helping users heat milk to the right range for smooth microfoam. Design & Build European Design The machine has a clean European-inspired design with a robust metal housing. Anti-Fingerprint Coating The anti-fingerprint coating helps keep the machine looking cleaner on the countertop.
