Product	Philips ProMix Hand Blender
SKU	cm-HR2535/01
Brand	Philips
Category	Kitchen & Dining
Minimum order quantity	1
Unit	—
Unit price	$84.00
Available quantity	100

Description

Philips Daily Collection ProMix Hand Blender The Philips Daily Collection ProMix Hand Blender is designed for users who want quick, simple, and efficient blending for everyday homemade meals. Its strongest selling point is not only the 650W motor. The real value is the ProMix blending technology combined with an anti-splash blade guard, ergonomic design, and easy accessory release system. This makes it practical for soups, sauces, dips, smoothies, baby food, and quick food preparation. Key Features 650W powerful motor Philips ProMix Advanced blending technology Anti-splash blade guard Ergonomic handheld design Single-button accessory release Fast and efficient blending Compact chopper accessory included Suitable for daily homemade meals Easy one-button operation Designed for smoother and more consistent blending Blending Performance ProMix Advanced Technology Philips ProMix technology uses a triangular blending shape to create better food flow and more consistent blending performance. This helps ingredients move efficiently through the blending head for faster and smoother results. 650W Motor The 650W motor provides strong everyday blending power for soups, sauces, dips, smoothies, and soft food preparation. Anti-Splash Design Anti-Splash Blade Guard The wave-shaped blade guard helps reduce splashes while blending. Real Buyer Benefit This matters because hand blenders can easily create mess if the blade guard is poorly designed. Less splash means easier cleanup and a cleaner kitchen counter. Ease of Use Ergonomic Design The handle is designed for comfortable grip and better control during blending. One-Button Operation Simple button control makes the blender easy to use for quick daily preparation. Accessory System Single Button Release The accessory release system allows users to attach or detach accessories with one press. Practical Advantage This makes switching between blending and chopping faster and easier. Compact Chopper Chopping Accessory Included The compact chopper can be used for herbs, nuts, cheese, chocolate, onions, and small food preparation tasks. This adds more value than a basic hand blender because it reduces the need for a separate mini chopper.
