Product specification sheet

Product	Philips 3000 Series Blender
SKU	cm-HR2041/15
Brand	Philips
Category	Kitchen & Dining
Minimum order quantity	1
Unit	—
Unit price	$60.00
Available quantity	100

Description

Philips 3000 Series Blender HR2041/1 The Philips 3000 Series Blender HR2041/1 is designed for everyday blending, smoothies, sauces, ice crushing, and basic ingredient preparation at home. Its strongest selling point is not only the 450W motor. The real value is the ProBlend system, which combines motor power, blade design, and jar structure to create smoother blending with fewer lumps in less time. Key Features 450W motor Unique ProBlend system Smooth blending with no lumps in 45 seconds 1.9L maximum jar capacity 1L effective capacity Serves up to 5 drinks 1 speed setting + pulse Durable stainless steel blades Crushes ice into fine pieces in 45 seconds Plastic jar Dishwasher-safe jar, lid, and blades Suction feet for better stability MTP sensor to help prevent motor overheating Compatible with NutriU app recipe ideas Blending Performance ProBlend System The ProBlend system combines three key elements: a 450W motor, specially shaped blades, and a ribbed jar design that guides ingredients back into the blending flow. This helps create smoother results for drinks, smoothies, sauces, and everyday kitchen preparation. Smooth Results in 45 Seconds The blender is designed to produce smooth blending with fewer lumps in around 45 seconds, depending on ingredients and quantity. Blade Design Durable Stainless Steel Blades The stainless steel blades are designed to stay sharp and resist rust or tarnishing for longer. 4-Star Blade Mill The blade mill is designed for efficient grinding, making it useful for coffee, nuts, herbs, and spices. Ice Crushing Pulse Function for Ice The ProBlend system with Pulse setting can crush ice into fine pieces in around 45 seconds. This makes it useful for chilled smoothies, cold drinks, and dessert preparation. Capacity 1.9L Maximum Capacity The jar has a maximum capacity of 1.9L. 1L Effective Capacity The effective blending capacity is 1L, enough for up to 5 drinks based on 200ml servings. Ease of Use 1 Speed + Pulse The simple control system makes it easy to blend, mix, grind, and crush with one speed setting plus pulse control. Ergonomic Design The jar shape is designed for comfortable handling, while the rotary knob makes operation straightforward. Cleaning & Stability Easy to Clean The jar has a removable lid, and the jar, blades, and lid are dishwasher safe. Suction Feet The suction feet help keep the blender stable and reduce vibration during use. Motor Protection MTP Sensor The Motor Thermo Protection sensor helps protect the motor from overheating and over-current conditions during operation.
