Product	Mcdodo MC-628 20W Power Bank
SKU	cm-MC-6282
Brand	Mcdodo
Category	Accessories
Minimum order quantity	1
Unit	—
Unit price	$20.00
Available quantity	100

Description

Mcdodo 20W 5000mAh Lightning Power Bank Black The Mcdodo MC-628 20W 5000mAh Lightning Power Bank is designed for iPhone users who want a compact backup charger without carrying an extra cable. Its strongest selling point is not only the 5000mAh capacity. The real value is the built-in Lightning connector, pocket-sized body, 20W fast charging support, and built-in stand, making it practical for travel, daily commuting, school, office, and emergency charging. Key Features 5000mAh compact power bank Built-in Lightning connector for iPhone Supports up to 20W fast charging PD fast charging support Built-in phone stand Pocket-friendly mini size Lightweight 102g body USB-C input for recharging the power bank Ideal for iPhone users Black color design Charging Performance Built-In Lightning Connector The built-in Lightning connector allows users to charge compatible iPhones directly without carrying a separate cable. This is the product’s main selling point because it removes cable hassle during travel or daily use. 20W Fast Charging The power bank supports up to 20W output, making it useful for faster iPhone charging compared to basic low-power portable chargers. 5000mAh Capacity The 5000mAh battery capacity gives practical backup power for daily emergency charging and short trips. Built-In Stand Hands-Free Viewing The built-in bracket design allows users to stand the phone while charging. This is useful for watching videos, video calls, scrolling, or keeping the phone visible on a desk while charging. Portability Compact Mini Design With a small body and 102g weight, the power bank is easy to carry in a pocket, handbag, backpack, or travel pouch. Best For Daily carry, short travel, office backup, school use, commuting, and emergency phone charging. Important USB-C Clarification USB-C Input Only The USB-C port is used to recharge the power bank. Do not position the USB-C port as a phone-charging output unless confirmed on the actual product box. Based on the provided information, the key phone charging method is the built-in Lightning connector.
