SKU	cm-XB1012
Brand	Philips
Category	Home Appliances
Minimum order quantity	1
Unit	—
Unit price	\$125.00
Available quantity	0

Description

Philips 1000 Series Bagless Vacuum Cleaner XB1012 The Philips 1000 Series XB1012 is designed for users who want a compact bagless vacuum cleaner with strong everyday suction and easy storage. Its strongest selling point is not only the 1200W motor. The real value is the balance between practical home cleaning, PowerCyclone 3 performance, bagless emptying, compact storage, and 3-stage filtration. This makes it a strong option for apartments, smaller homes, and users who want a simple vacuum without bulky storage problems. Key Features 1200W motor PowerCyclone 3 technology Bagless vacuum design Multi-purpose nozzle Suitable for hard floors and carpets Compact and lightweight body Easy dust emptying 3-stage filtration system Washable motor filter Captures over 99.9% of particles Easy storage in cupboards or wardrobes Cleaning Performance 1200W Motor The 1200W motor provides strong suction for daily dust, dirt, and debris on hard floors and carpets. PowerCyclone 3 Technology PowerCyclone 3 accelerates airflow inside the cyclonic chamber and separates dust from air, helping maintain strong performance for longer during cleaning. Floor Cleaning Multi-Purpose Nozzle The multi-purpose nozzle is designed for different floor types. Use the brush setting for hard floors to help protect surfaces, then switch to the smooth soleplate for carpet cleaning. Bagless Convenience Easy Dust Emptying The bagless design removes the need for dust bags. After cleaning, users can empty the dust container directly into the bin. Real Buyer Benefit This makes the vacuum easier and cheaper to maintain compared to bagged models. Compact Design Easy Storage The compact and lightweight body makes the vacuum easier to store in cupboards, wardrobes, or small storage spaces. Best For Apartments, small homes, quick cleaning, and users who do not want a heavy vacuum cleaner. Filtration 3-Stage Filter System The 3-stage filtration system captures over 99.9% of particles and helps keep dust inside the dust container. Washable Motor Filter The washable motor filter supports easier maintenance and helps keep the vacuum performing properly over time.
