Product	Mcdodo OT-8730 OTG Type-C Adapter
SKU	cm-OT-8730
Brand	Mcdodo
Category	Accessories
Minimum order quantity	1
Unit	—
Unit price	$9.00
Available quantity	100

Description

Mcdodo OT-8730 OTG USB-A 3.0 to Type-C Adapter The Mcdodo OT-8730 is a compact OTG adapter designed to connect USB-A devices to USB-C phones, tablets, laptops, and other compatible Type-C devices. Its strongest selling point is not only fast transfer speed. The real value is practical device expansion: users can connect flash drives, keyboards, mice, card readers, cameras, and other USB-A accessories directly to a USB-C device without needing a laptop or hub. Key Features USB-A 3.0 to USB-C OTG adapter Supports OTG device connection Transfer speed up to 400MB/s Supports up to 3A charging Helps transfer photos, videos, and files quickly Can connect USB flash drives, keyboards, mice, cameras, card readers, and gamepads Compact mini size for easy carrying Zinc alloy shell for better durability Matte anti-fingerprint metal finish OTG Function Direct USB Device Access The OTG function allows compatible USB-C devices to read USB-A accessories directly. This is useful for users who want to open documents, watch stored videos, transfer photos, or back up files without downloading everything to the phone first. File Transfer Performance Up to 400MB/s Transfer Speed The USB 3.0 connection supports high-speed file transfer, making it useful for large photos, videos, documents, and media files. Important Reality Actual transfer speed depends on the connected phone, USB drive, file size, storage quality, and device compatibility. Charging Support Up to 3A Charging The adapter supports up to 3A current when used with compatible devices, cables, and chargers. This is useful for basic charging support, but the adapter should not be positioned as a dedicated fast charger. Device Compatibility Supported USB Accessories The adapter can connect with: USB flash drives Mouse Keyboard Camera Card reader Gamepad Other compatible USB-A devices Important Compatibility Note The connected phone, tablet, or laptop must support OTG function. Some devices may not support every USB accessory. Build Quality Zinc Alloy Shell The zinc alloy body gives the adapter stronger durability than basic plastic adapters. Matte Anti-Fingerprint Finish The matte metal texture helps reduce fingerprints and keeps the adapter looking cleaner during daily use.
