Description

Mcdodo CC-6601 Mini Dual USB Car Charger Short Strategic Positioning Paragraph The Mcdodo CC-6601 is a compact dual USB car charger made for simple, reliable charging while driving. With two USB-A ports, 5V/2.4A total output, 12V–24V vehicle compatibility, and built-in safety protection, it is a practical everyday accessory for keeping phones and USB-powered devices charged on the road. Key Features Dual USB Charging PortsCharge two USB-powered devices at the same time, such as phones, earbuds, GPS devices, or small accessories. Compact Mini DesignFits neatly into the car power socket without taking up unnecessary space. 5V/2.4A Total OutputProvides stable everyday charging for phones and other USB devices. 12V–24V Vehicle CompatibilitySuitable for most standard car and vehicle power sockets. Built-In Smart ChipHelps manage power output for safer and more stable charging. Multiple Safety ProtectionsIncludes protection against overcharging, current issues, temperature problems, and power surges. Wide USB CompatibilityWorks with phones and other devices that support USB charging. Certified Safety StandardsCE, FCC, and RoHS certifications support safer daily use.
