Product	Mcdodo UniPower MC-8651 Power Bank
SKU	cm-MC-8651
Brand	Mcdodo
Category	Accessories
Minimum order quantity	1
Unit	—
Unit price	$30.00
Available quantity	0

Description

Mcdodo UniPower All-in-One Magnetic Power Bank MC-8651 The Mcdodo UniPower MC-8651 is designed for users who want one portable charging solution that combines magnetic wireless charging, wired USB-C charging, a built-in stand, and battery display in one compact power bank. Its strongest selling point is not only magnetic charging. The real value is convenience: charge your phone wirelessly, use the built-in USB-C cable, watch videos hands-free, and check battery level without carrying extra accessories. One important note: you wrote 1000mAh, but for this type of magnetic power bank it is very likely 10000mAh. Verify the capacity before publishing, because this is a critical spec. Key Features All-in-one magnetic power bank Model: MC-8651 Built-in USB-C cable Built-in phone stand Magnetic wireless charging support 15W wireless fast charging 20W wired charging Wired and wireless charging support Real-time LED battery display Strong magnetic attachment Travel-friendly portable design Suitable for airline carry-on use when capacity is compliant Charging Performance 15W Wireless Charging The magnetic wireless charging function supports up to 15W output, making it useful for quick, cable-free phone charging. 20W Wired Charging The built-in USB-C cable supports up to 20W wired charging, giving faster and more stable charging than wireless mode. Wired + Wireless Charging The power bank can support wired and wireless charging use, making it practical when charging more than one device or when you want flexibility. Magnetic Design Strong Magnetic Adsorption The magnetic attachment helps keep compatible phones aligned during wireless charging. Best Compatibility Works best with MagSafe-compatible iPhones or phones using a magnetic case or magnetic ring. Built-In Stand Hands-Free Viewing The integrated stand allows users to watch videos, make video calls, stream, or work while charging. Real Buyer Benefit This turns the power bank into both a charger and a phone support accessory, reducing the need to carry a separate stand. Built-In Cable USB-C Cable Included The built-in USB-C cable makes charging more convenient because users do not need to carry a separate cable for compatible devices. Practical Advantage This is especially useful for travel, work bags, school bags, and daily commuting. LED Battery Display Real-Time Battery Status The LED display shows the remaining battery level, helping users know when the power bank needs recharging. Travel Use Portable Travel Design The power bank is designed for easy carrying during daily use and travel. Airline Note Do not overclaim airline approval unless the exact capacity and watt-hour rating are confirmed. Most power banks under airline limits are allowed in carry-on luggage, but rules can vary by airline and country. Technical Specifications Brand Mcdodo Model MC-8651 Product Type All-in-one magnetic power bank Wireless Charging Up to 15W Wired Charging Up to 20W Cable Built-in USB-C cable Stand Built-in phone stand Display Real-time LED battery display Magnetic Attachment Supported Battery Capacity Needs verification before publishing. Provided data says 1000mAh, but likely intended as 10000mAh.
