Description

Tempered Film Lens Protective Film for Insta360 Ace Pro The Tempered Film Lens Protective Film for Insta360 Ace Pro is designed to protect the camera lens and screen area from scratches, dust, fingerprints, and daily wear. Its strongest selling point is not only tempered glass. The real value is preserving image clarity while adding a protective layer to one of the most exposed parts of the camera. Key Features Designed for Insta360 Ace Pro / Ace Tempered glass protective film Scratchproof protection High-definition transparency High light transmittance Helps protect lens and screen surfaces Slim protective design Suitable for daily travel and action camera use Protection Performance Scratchproof Tempered Glass The tempered glass material helps protect against surface scratches from bags, keys, dust, sand, and everyday handling. Real Buyer Benefit Action cameras are often used outdoors, placed in bags, mounted on accessories, and exposed to rough environments. A protective film helps reduce cosmetic damage and keeps the lens/screen area cleaner for longer. Image Clarity High Definition & High Transmittance The protective film is designed to maintain clear viewing and shooting quality with minimal impact on image visibility. Why It Matters For camera accessories, protection is not enough. The film must also preserve clarity, because poor glass quality can reduce sharpness, contrast, or image cleanliness. Compatibility Suitable For Insta360 Ace Pro Insta360 Ace Material & Design Material Tempered glass Size 9.7 × 6.4 × 1.5cm. Product Type Screen / lens protective
