Product specification sheet

Product	Dreame F10 Robot Vacuum Mop
SKU	cm-F10
Brand	Dreame
Category	Home Appliances
Minimum order quantity	1
Unit	—
Unit price	$249.00
Available quantity	100

Description

Dreame F10 Robot Vacuum and Mop Cleaner The Dreame F10 is designed for users who want powerful automated floor cleaning with vacuuming, mopping, smart mapping, and app control in one system. Its strongest selling point is not only the 13,000Pa suction. The real advantage is the combination of strong suction, long runtime, LiDAR mapping, obstacle avoidance, 2-in-1 vacuum and mop function, and multi-floor app control. One issue in the provided specs: 200mAh battery is almost certainly incorrect for a robot vacuum claiming 300 minutes runtime and 270m² coverage. You should verify the battery capacity before publishing. Key Features 13,000Pa suction power 2-in-1 vacuum and mop cleaning Up to 300 minutes runtime Cleans up to 270m² on a single charge Auto-recharge support Smart Pathfinder mapping Intelligent LiDAR navigation Obstacle avoidance Edge and ledge detection 20mm threshold climbing 235ml water tank 570ml dust box 32 moisture levels Dreamehome App control Multi-floor mapping No-go zone setup Voice control with Alexa, Siri and Google Home Cleaning Performance 13,000Pa Suction The Dreame F10 delivers strong suction for dust, crumbs, particles, and hair across different floor types. Real Buyer Benefit High suction matters most for homes with pets, carpets, daily dust, and visible debris. But suction alone does not guarantee perfect cleaning; navigation and brush design also matter. Vacuum & Mop Function 2-in-1 Cleaning The F10 can vacuum and mop in one cleaning routine, making it useful for regular floor maintenance. Water Tank 235ml water tank for mopping. Moisture Control 32 moisture levels allow users to adjust water output based on the floor type and cleaning need. Dust Box 570ml dust box for collecting debris before emptying. Navigation & Mapping Smart Pathfinder Mapping Smart Pathfinder mapping helps the robot plan more organized cleaning paths instead of moving randomly. LiDAR Navigation LiDAR mapping improves room scanning, route planning, and cleaning coverage. Obstacle Avoidance Obstacle detection helps the robot avoid furniture, objects, edges, and ledges. Threshold Climbing The robot can climb thresholds up to 20mm, helping it move between rooms and floor transitions. App & Voice Control Dreamehome App The app allows users to manage cleaning modes, schedules, maps, rooms, and no-go zones. Multi-Floor Mapping Multi-floor support makes it more practical for homes with more than one level. Voice Control Compatible with Alexa, Siri, and Google Home for hands-free control. Battery Life Runtime Up to 300 minutes. Cleaning Coverage Up to 270m² on a single charge. Auto-Recharge The robot returns to recharge when the battery is low, helping continue cleaning with fewer interruptions. Battery Capacity Note The provided data says 200mAh, but that does not match the claimed runtime or cleaning coverage. Verify the correct battery capacity before adding it to the final product page.
