Product specification sheet

Product	Dreame X50 Ultra Complete Robot Vacuum
SKU	cm-X50 Ultra
Brand	Dreame
Category	Home Appliances
Minimum order quantity	1
Unit	—
Unit price	$1,849.00
Available quantity	0

Description

Dreame X50 Ultra Complete Robot Vacuum & Mop The Dreame X50 Ultra Complete is positioned as a premium robot vacuum and mop system for users who want advanced floor cleaning with serious automation. Its strongest selling point is not only suction or mopping. The real advantage is its ability to handle real home obstacles better than most robot vacuums, including thresholds, carpets, low furniture, corners, hair, and hands-free dock maintenance. This is a strong option for large homes, pet owners, mixed floors, and users who want a more intelligent cleaning system with less daily involvement. Key Features Robotic retractable feet for obstacle crossing Crosses thresholds and barriers up to 2.5 inches VersaLift Navigation for low furniture cleaning AI camera with LED guidance PowerDock with automatic maintenance Auto mop washing Automatic dust collection Automatic water refilling and draining Hot water mop washing up to 80°C UV bacteria reduction technology Dual Flex Arm side brush and mop extension Intelligent mop lifting Carpet cleaning strategy with multiple modes Precision laser mapping and navigation App control Up to 200 minutes battery life Cleaning Performance Vormax Suction System Powered by Dreame’s TurboForce motor system, the X50 Ultra Complete is designed to pick up common household debris such as dust, crumbs, particles, pet hair and cat litter. Large Particle Pickup This is important for real homes because robot vacuums are often judged not by fine dust alone, but by how well they handle visible mess. Obstacle Crossing Robotic Retractable Feet The X50 Ultra Complete can cross door rails, thresholds and obstacles up to 2.5 inches. Why It Matters Many robot vacuums fail when moving between rooms because of thresholds, carpets, rails, and uneven floor transitions. This feature directly attacks one of the biggest practical limitations in robot vacuum ownership. Low Furniture Cleaning VersaLift Navigation VersaLift Navigation reduces the robot height by 89mm, allowing it to clean under sofas, beds and low furniture more easily. AI Camera with LED Guide The AI camera and LED guidance help improve navigation in tighter or darker areas, reducing obstacle impact and improving cleaning coverage. Mop Cleaning System Auto Mop Washing The dock washes the mop automatically, reducing manual cleaning after each session. Hot Water Mop Washing Mop washing at up to 80°C helps improve mop pad cleanliness after floor cleaning. UV Bacteria Reduction The PowerDock uses UV light support to help maintain a cleaner dock and mop environment. Automatic Mop Drying Drying helps reduce moisture buildup and odor after mop washing. Base Station Automation PowerDock System The multifunctional dock supports: Automatic dust collection Automatic water refilling Automatic water draining Automatic mop washing Automatic mop drying Cleaning solution mixing Real Buyer Benefit This is what makes the X50 Ultra Complete feel premium. It reduces the boring parts of robot vacuum ownership: emptying dust, washing mop pads, refilling water and dealing with wet mop odor. Edge & Corner Cleaning Dual Flex Arm Technology The side brush and mop can extend outward to reach corners, edges and low areas under furniture. Hair Management The redesigned brush helps reduce hair tangling, which is a major advantage for homes with pets or long hair. Carpet Cleaning Five Carpet Cleaning Modes The X50 Ultra Complete supports multiple carpet strategies, including: Mop removal to keep carpets dry Mop lifting for carpets Carpet avoidance Increased suction for deeper cleaning Double-pass intensive carpet cleaning Why This Matters Mixed-floor homes are where many robot vacuums struggle. Carpet strategy is not optional; it is a core buying factor. Navigation & Control Precision Laser Mapping The robot uses laser mapping and navigation to build cleaning routes and manage room layouts. App Control App control allows users to manage cleaning modes, schedules, rooms and maps. Battery Life Runtime Up to 200 minutes battery life. Battery Type Lithium-ion battery. Technical Specifications Brand Dreame Model X50 Ultra Complete Product Type Robot vacuum and mop cleaner Surface Recommendation Hard floor and carpet Special Features Auto mop washing, automatic dust collection, automatic height adjustment, intelligent mop lifting, precision laser mapping and navigation Battery Life Up to 200 minutes Battery Type Lithium-ion Controller Type App control Dimensions 35 × 8.8 × 35 cm Item Weight 15.57kg Included Components Dreame X50 Ultra Robot Vacuum, instructions and accessories
