Product specification sheet

Product	Dreame D20 Plus Robot Vacuum (White)
SKU	cm-291781
Brand	Dreame
Category	Home Appliances
Minimum order quantity	1
Unit	—
Unit price	$349.00
Available quantity	0

Description

Dreame D20 Plus Robot Vacuum The Dreame D20 Plus is built for users who want stronger automated cleaning with less daily maintenance. Its strongest selling point is not only the 13,000Pa suction. The real advantage is the combination of high suction power, 150-day auto-empty dust collection, detangling brush design, and vacuum-and-mop functionality. This makes it a strong option for homes with dust, crumbs, pet hair, carpets, and mixed floor surfaces. Key Features 13,000Pa Vormax™ suction power Up to 150 days hands-free dust collection 5L dust bag storage HyperStream™ Detangling DuoBrush 2-in-1 vacuum and mop cleaning Smart Pathfinder™ Navigation App and voice control support 350ml water tank 500ml dust box 32 moisture levels Five adjustable suction levels Auto recharge and resume cleaning Cleaning Performance 13,000Pa Vormax™ Suction The D20 Plus delivers strong suction for removing dust, crumbs, particles, and hair from different surfaces. Five Suction Levels Users can adjust the suction level based on the room, floor type, and cleaning need. Large Particle Pickup The vacuum is designed to handle common household messes such as food crumbs, hair, and dust particles. Hands-Free Dust Collection 150-Day Auto-Empty System The auto-empty station collects dust into a large dust bag, reducing the need for frequent manual emptying. 5L Dust Bag The large dust bag supports up to 150 days of hands-free dust collection, depending on usage, home size, and dust level. Detangling Brush System HyperStream™ Detangling DuoBrush The dual-brush system is designed to lift debris from hard floors, carpets, and floor gaps while reducing hair tangles. Hair Management This is a major selling point for homes with pets or long hair, because tangled brushes are one of the biggest frustrations with robot vacuums. Vacuum & Mop Function 2-in-1 Cleaning The D20 Plus can vacuum and mop in one cleaning run, making it useful for everyday floor maintenance. Water Tank 350ml water tank for mopping. Dust Box 500ml dust box for collecting dirt and debris. Moisture Control 32 moisture levels allow better control depending on the floor type and cleaning need. Navigation & Mapping Smart Pathfinder™ Navigation The robot uses sensors and 360° environmental awareness to map and clean more efficiently. Smart Route Planning Designed to move through rooms with better cleaning coverage and fewer missed areas. App & Voice Control Dreamehome App The app allows users to customize cleaning by room, adjust settings, and manage cleaning routines. Voice Control Voice compatibility makes it easier to start or control cleaning without using the app manually. Battery & Runtime Auto Recharge When battery power gets low, the robot returns to recharge automatically. Resume Cleaning After charging, it can continue the unfinished cleaning job.
