Description

Ufesa CG7123 Active Drip Coffee Maker 12 Cups The Ufesa CG7123 Active Drip Coffee Maker is designed for users who want a simple and practical coffee machine for daily home or office use. With a 10–12 cup capacity, 1.2L water capacity, 680W power, permanent filter, pivoting and removable filter holder, nonstick hot plate, keep warm function, non-drip valve, and automatic shut-off, it is a convenient drip coffee maker for preparing multiple cups with less effort. Key Features 10–12 Cup CapacitySuitable for preparing coffee for family use, office use, guests, or daily morning routines. 1.2L Water CapacityAllows users to brew multiple cups in one cycle. 680W PowerProvides practical brewing performance for everyday drip coffee preparation. Permanent FilterReusable filter design helps reduce the need for disposable paper filters. Pivoting and Removable Filter HolderMakes filling, cleaning, and handling the filter area easier. Nonstick Hot PlateHelps keep the coffee warm after brewing and makes cleaning easier. Keep Warm FunctionKeeps brewed coffee warm for convenient serving after preparation. Non-Drip ValveHelps reduce dripping when removing the coffee jug. Automatic Shut-OffAdds convenience and safety by turning the machine off automatically. Simple Daily UsePractical for homes, kitchens, small offices, and daily coffee drinkers. Main Feature Sections Coffee for Multiple CupsThe Ufesa CG7123 Active is built for users who need more than one or two cups of coffee. Its 10–12 cup capacity and 1.2L size make it useful for families, offices, and serving guests. Easy Filter HandlingThe pivoting and removable filter holder makes the coffee maker easier to fill and clean. The permanent filter also makes daily brewing more convenient because users do not always need disposable filters. Keep Coffee Warm After BrewingThe nonstick hot plate and keep warm function help maintain coffee temperature after brewing, making it practical for users who like to prepare coffee and serve it gradually. Cleaner Pouring with Non-Drip ValveThe non-drip valve helps reduce mess when the jug is removed, keeping the countertop cleaner during daily use. Automatic Shut-Off ConvenienceThe automatic shut-off feature makes the coffee maker easier and safer to use, especially during busy mornings. Technical Specifications Product Type: Drip Coffee Maker Brand: Ufesa Model: CG7123 Active Capacity: 10–12 cups Water Capacity: 1.2L Power: 680W Filter Type: Permanent filter Filter Holder: Pivoting and removable Hot Plate: Nonstick hot plate Keep Warm Function: Supported Non-Drip Valve: Supported Automatic Shut-Off: Supported Use Case: Home coffee brewing, office coffee, daily coffee preparation, family use, and guest serving Coffee Capacity Cup Capacity: 10–12 cups Water Tank Capacity: 1.2L The large capacity makes it suitable for users who want to prepare several cups in one brewing cycle.
