Product	Ufesa Breeze Dry 5000 Dehumidifier
SKU	cm-UFSWSHADRY5000
Brand	Ufesa
Category	Consumer Electronics
Minimum order quantity	1
Unit	—
Unit price	\$377.00
Available quantity	100

Description

Ufesa Breeze Dry 5000 Dehumidifier for Rooms up to 40m² The Ufesa Breeze Dry 5000 Dehumidifier is designed for users who want to control humidity at home, reduce damp air, and create a more comfortable indoor environment. With 20L/day dehumidification capacity, room coverage up to 40m², integrated humidity sensor, adjustable humidity level from 30% to 90%, quiet operation up to 46dB, two fan speeds, clothes drying function, 6L water tank, full tank alarm, automatic shut-off, continuous drain tube, anti-freeze function, auto-oscillation, and built-in wheels, it is a practical humidity control solution for bedrooms, living rooms, laundry areas, and humid spaces. Key Features 20L/Day Dehumidification CapacityRemoves up to 20 liters of moisture per day, making it suitable for humid rooms and daily home use. Suitable for Rooms up to 40m²Designed for bedrooms, living rooms, laundry areas, offices, and other indoor spaces up to 40m². Integrated Humidity SensorDetects room humidity and allows more accurate humidity control. Adjustable Humidity LevelLets users set the desired humidity level between 30% and 90%. Quiet Operation up to 46dBDesigned to operate quietly, making it suitable for everyday indoor use. Auto-Oscillating FunctionHelps distribute airflow more effectively across the room. Adjustable Oscillation AngleAllows users to control the airflow direction based on room layout. Two Fan SpeedsOffers flexible airflow control depending on humidity level and comfort needs. Clothes Drying FunctionUseful for humid days when laundry takes longer to dry indoors. 6L Water TankLarge tank capacity reduces the need for frequent emptying. Full Tank Alarm with Automatic Shut-OffAlerts users when the tank is full and automatically stops operation to help prevent overflow. Continuous Drain Tube IncludedAllows continuous drainage for longer operation without manually emptying the tank. Anti-Freeze FunctionHelps maintain optimal performance in cooler conditions. Built-In WheelsMakes it easier to move the unit between rooms. Main Feature Sections Control Humidity in Rooms up to 40m²The Ufesa Breeze Dry 5000 is built for homes where excess humidity affects comfort, air quality, laundry drying, or room freshness. Its 20L/day dehumidification capacity makes it suitable for medium-sized rooms up to 40m². Set Your Preferred Humidity LevelThe integrated humidity sensor allows users to select a humidity level between 30% and 90%. This helps create a more controlled indoor environment instead of relying only on manual operation. Quiet and Practical Daily OperationWith a maximum noise level of 46dB, the dehumidifier is suitable for everyday use in living rooms, bedrooms, home offices, and laundry areas without being overly disruptive. Clothes Drying SupportThe clothes drying function is especially useful on humid days or in homes where laundry is dried indoors. It helps reduce excess moisture and supports faster drying conditions. Safer Tank and Drainage ManagementThe 6L tank, full tank alarm, automatic shut-off, and continuous drain tube give users flexible operation. Use the tank for normal daily use or connect the drain tube for longer continuous dehumidification. Technical Specifications Product Type: Dehumidifier Brand: Ufesa Model: Breeze Dry 5000 / Dry5000 Recommended Room Size: Up to 40m² Dehumidification Capacity: 20L/day Humidity Setting Range: 30%–90% Humidity Sensor: Integrated humidity sensor Noise Level: Up to 46dB Fan Speeds: 2 speeds Auto-Oscillation: Supported Oscillation Angle: Adjustable Clothes Drying Function: Supported Water Tank Capacity: 6L Full Tank Alarm: Supported Automatic Shut-Off: Supported Continuous Drainage: Drain tube included Anti-Freeze Function: Supported Mobility: Built-in wheels Use Case: Humidity control, bedroom use, living room use, laundry drying, home comfort, damp room control, and indoor air comfort Humidity Control Humidity Sensor: Integrated Adjustable Humidity Range: 30%–90% Daily Moisture Removal: Up to 20L/day Recommended Coverage: Rooms up to 40m² Humidity performance depends on room size, temperature, ventilation, starting humidity level, and how often doors or windows are opened. Water Tank & Drainage Tank Capacity: 6L Full Tank Alarm: Supported Automatic Shut-Off: Supported Continuous Drain Tube: Included The water tank is practical for normal use, while the continuous drain tube is useful for long operation or high-humidity rooms. Airflow & Noise Fan Speeds: 2 Auto-Oscillation: Supported Oscillation Angle: Adjustable Maximum Noise Level: 46dB The two fan speeds allow users to balance drying performance, airflow, and comfort. Clothes Drying Function The clothes drying function helps reduce excess humidity around laundry and supports faster drying conditions indoors. Actual drying performance depends on room ventilation, fabric type, laundry load, temperature, and starting humidity. Best Use Cases Humid bedrooms Living rooms up to 40m² Laundry rooms Indoor clothes drying Damp apartments Home offices Basements or storage rooms, if suitable for the environment Rainy and humid days Reducing moisture discomfort Users

who want adjustable humidity control Users who need continuous drainage option Compatibility Suitable for indoor room use up to 40m² Works best in closed rooms with limited open windows or doors Continuous drainage requires correct drain tube placement and a suitable drainage point Built-in wheels make it easier to move between rooms on flat surfaces.
