Product specification sheet

Product	Beper Insulated Flask 500ml
SKU	cm-C102bot002
Brand	Beper
Category	Consumer Electronics
Minimum order quantity	1
Unit	—
Unit price	$7.00
Available quantity	100

Description

Modern and Safe Design: The bottle has a modern and versatile shape, designed to facilitate transport. Plus, safety is paramount, as the water bottles are made from non-toxic, bpa-free, food grade 18/8 stainless steel. Food grade stainless steel construction offers pure taste, no breakage and protection from heat and light. Non-Contact with Plastic: The drink will only be in contact with the internal and external stainless steel. The lower part of the lid is made of stainless steel for food, to ensure a pure taste because it does not retain odors and flavors. Free of bpa, lead, phthalates and other toxic substances. Swivel Carabiner: Thanks to the lightweight and portable design and practical carabiner, the bottle can be taken anywhere. The steel water bottle can be used at home, at the gym, on the road, in the car, at the beach, camping, school or work. Waterproof: Thanks to the hermetic cap, the bottle is watertight thanks to the silicone seal for food. This allows you not to lose water in your bag or backpack. For adults and children: It is ideal for hanging from backpacks during excursions or for children to go to school with their favorite drink. Dimensions (HxWxD): 19.5×7.9×7.9cm Weight: 160g
