Product specification sheet

Product	Redmi Buds 6 (Black)
SKU	cm-42582320840802
Brand	Redmi
Category	Audio & Video
Minimum order quantity	1
Unit	—
Unit price	$55.00
Available quantity	100

Description

Dual drivers for rich sound: With a 12.4 mm titanium-coated membrane and a 5.5 mm small piezoelectric micro ceramic unit, the two acoustic drivers work harmoniously together to deliver dynamic, clear and captivating sound with high detail. Active noise cancellation up to 49 dB: Thanks to the acoustic cavity structure developed by Xiaomi itself, the earphones have a maximum noise cancellation of 49 dB, which covers a bandwidth of 2000 Hz while blocking up to 99.6% of external noise. Isolating external distractions allows for a quiet and intense listening experience. AI noise reduction with two micros for clearer calls, even at wind speeds of 9m/s: The self-developed, AI-powered two-channel noise cancellation algorithm detects wind noise in real time for more user comfort. The perforated design optimises the microphone structure and effortlessly achieves a maximum wind noise reduction of 9 m/s. Even outdoors, conversations remain crystal clear. Built-in immersive sound with 360° audio effect: the HRTF sound effect algorithm developed by Xiaomi Acoustic Lab itself creates a 360° surround sound effect with a strong sense of space, which provides an even more intense audiovisual experience. Up to 42 hours of listening pleasure with charging case: Charge once for up to 10 hours of music enjoyment. In conjunction with the charging case, the battery life extends to 42 hours, so you can easily satisfy your entertainment needs on the go. Super fast charging is also supported. With just 10 minutes of charging, 4 hours of music playback is possible for long-lasting music enjoyment
