Product	DJI Mic Mini Wireless Microphone
SKU	cm-DJI-MIC-MINI
Brand	DJI
Category	Audio & Video
Minimum order quantity	1
Unit	—
Unit price	\$115.00
Available quantity	100

Description

DJI Mic Mini 2TX + 1RX + Charging Case The DJI Mic Mini is designed for creators who need clean wireless audio in a small, discreet, and easy-to-use microphone system. Its strongest selling point is not only the compact size. The real advantage is the combination of ultralight transmitters, stable 400m transmission, two-person recording, 48-hour total battery life, two-level noise cancelling, and DJI OsmoAudio™ direct connection for a simpler creator workflow.

Key Features

- 2 transmitters + 1 receiver + charging case
- Small and discreet wireless microphone system
- Transmitter weighs only 10g
- Omnidirectional audio recording
- Stable transmission up to 400m
- Receiver supports two transmitters at the same time
- Up to 48 hours total operation with charging case
- Up to 11.5 hours transmitter runtime
- Up to 10.5 hours receiver runtime
- Two-level active noise cancelling
- Automatic limiting to reduce audio clipping
- DJI OsmoAudio™ direct connection
- Magnetic and clip-on wearing options
- Audio Performance
- Omnidirectional Audio Recording

The DJI Mic Mini captures sound from all directions, making it useful for interviews, vlogs, livestreams, tutorials, and mobile content recording.

Two-Person Recording The receiver can pair with two transmitters at the same time, making it suitable for interviews, podcasts, two-person videos, and creator collaborations.

Wireless Transmission Up to 400m Stable Transmission The system supports stable audio transmission up to 400m in suitable conditions.

Important Reality Actual range depends on the environment, interference, obstacles, body blocking, and device placement. In real-world city or indoor use, range can be lower than lab conditions.

Noise Cancelling Basic Noise Cancelling Best for quiet indoor environments. It reduces light background noise while keeping vocal clarity natural. Strong Noise Cancelling Best for noisy environments. It reduces more ambient sound for clearer voice pickup in busy locations.

Automatic Limiting Audio Clipping Protection Automatic limiting helps reduce distortion when the input volume gets too loud. This is important because clipped audio is difficult to fix after recording. For creators, this feature protects usable footage.

DJI OsmoAudio™ Direct Connection Receiver-Free DJI Workflow The transmitter can connect directly to select DJI products without using the receiver.

Real Buyer Benefit This reduces gear, simplifies setup, and makes recording faster for DJI camera users.

Design & Wearing Options

- 10g Ultralight Transmitter Each transmitter weighs only 10g, making it comfortable to wear and less visible on camera.
- Magnetic and Clip-On Wearing Multiple wearing options allow users to attach the mic more naturally depending on clothing, filming angle, and content style.
- Battery Life Transmitter Runtime Up to 11.5 hours. Receiver Runtime Up to 10.5 hours. Total Runtime with Case Up to 48 hours.

Technical Specifications

- Product Type Wireless microphone system
- Configuration 2 transmitters + 1 receiver + charging case
- Transmitter Weight 10g
- Recording Pattern Omnidirectional
- Transmission Range Up to 400m
- Noise Cancelling Two levels: Basic and Strong
- Automatic Limiting Supported
- DJI OsmoAudio™ Direct Connection Supported with select DJI products
- Transmitter Battery Life Up to 11.5 hours
- Receiver Battery Life Up to 10.5 hours
- Total Battery Life with Case Up to 48 hours
