Description

Designed by Apple, the TechWoven Case with MagSafe offers beautiful personalization and protection for your iPhone 17 Pro This case is made from a custom technical woven fabric, made from 100 percent recycled polyester. Multiple colored yarns are woven together on a Jacquard loom creating a dimensional texture with a rich depth of color. The sides of the case are coated with a lightly textured TPU for better grip. The refined anodized aluminum buttons provide precise and responsive feedback. Featuring two connection points, this case can securely attach to the Crossbody Strap, allowing you to conveniently wear your iPhone hands-free. With built-in magnets that align perfectly with iPhone 17 Pro, this case offers a magical attach experience and faster wireless charging, every time. When it’s time to charge, just leave the case on your iPhone and snap on your MagSafe charger, or set it on your Qi2 25W or Qi-certified charger. Like every Apple-designed case, it undergoes thousands of hours of testing throughout the design and manufacturing process. So not only does it look great, it’s built to protect your iPhone from scratches and drops
