Description

Beurer Germany HD 74 LE24 Electric Blanket: Cosy Heated Over Blanket Throw in Limited Edition Black. Perfectly Soft & Super Cosy for Snuggling Up. Machine washable. 130x150cm. Experience the ultimate in comfort and warmth on those chilly days with the Beurer Germany HD 74 Cosy Heated Electric Over Blanket in Limited Edition Black! Wrap yourself in luxury! Why You'll Love It: This warming overblanket is so much more versatile than a heated underblanket. Crafted with luxurious fleecy material, this blanket is perfect for snuggling on the couch, keeping warm while you work, or adding a touch of coziness thrown over you on your bed. Key Features: 6 Illuminated Temperature Settings: Tailor your warmth with ease. The blanket has six individually adjustable temperature levels with electronic temperature control. Automatic Switch-Off: Peace of mind with an automatic shut-off feature after 3 hours. Machine Washable: Easy care—simply wash at 30 C (gentle cycle) and keep it fresh. Safety First: Equipped with the Beurer Safety System (BSS) to prevent overheating. Perfect for Every Room: Transform any space into a cozy retreat. Whether you're watching TV in the lounge, reading in bed, or working from home, this heated blanket is your go-to for comfort. Quality You Can Trust: Beurer has been a leader in health and wellbeing since 1919. Our textile products meet the stringent requirements of the OEKO-TEX Standard 100, ensuring that you can enjoy luxury without compromise.

Specifications: Size: 130 x 150 cm Colour: Limited Edition Black Fabric: Cosy Fleece 6 Illuminated Temperature Settings: Please note the blanket warms up to a comfortable temperature which enhances the effect of the cosy fleece, and never gets very hot. The temperature development at the individual levels in degrees Celsius is as follows (with approximately a 3-degree Celsius variable temperature at each level): Level 0: OFF Level 1 (minimum heat): 31 Level 2: 33 Level 3: 35 Level 4: 36 Stage 5: 38 Level 6 (maximum heat): 40 The final temperature is reached after 30-45 minutes. NOTE: The fastest way to warm up the heated overblanket is to initially set the highest temperature setting. WARNING: If the heated overblanket is being used over several hours, we recommend that you set the lowest temperature setting on the control to avoid the body overheating and thereby any potential burns to the skin or heat stroke. Automatic Switch-Off: This heated overblanket switches itself off automatically after 3 hours. To switch on the heated overblanket again, first set the side ON/OFF sliding switch on the control to the OFF position for 5 seconds. After about 5 seconds it is possible to switch it on again. Oeko-Tex Standard 100: The textiles used in this device comply with the rigorous human ecological standards of OEKO-TEX STANDARD 100, as verified by the Hohenstein Research Institute. This ensures ongoing quality control through a globally recognized, independent testing and certification system for raw, semi-finished, and finished textile products. Machine-Washable up to 30 Degrees Celsius: Use an extra delicate cycle once control has been removed. NB CAUTION Please note that frequent washing of heated blankets has a negative effect on the product. The heated blanket could be washed in a washing machine once per season, if necessary, and a maximum of 5 times during its life. Immediately after washing, reshape the blanket to its original dimensions while it is still wet and spread it out flat over a clothes horse to dry. Set the washing machine to a particularly gentle wash cycle (lowest spin rpm) at 30 C (wool cycle). Use a delicate laundry detergent and measure it out according to the manufacturer's instructions. Heated blankets may not be chemically cleaned, wrung out, tumble dried, put through a mangle or ironed. Small marks on the heated throw can be removed with a damp cloth or sponge and, if necessary, with a little liquid detergent for delicate laundry. Do not use pegs or similar items to attach the heated throw to the clothes horse. Failure to do so may damage the heated throw. Do not reconnect the control to the heated throw until the plug-in connector and heated throw are completely dry. Failure to do so may damage the heated throw. WARNING: Never switch the heated throw on to dry it as there is a risk of electric shock!! Beurer Safety System BSS: Safety is the most important issue when it comes to flexible heating products. We are well aware of this responsibility and therefore use the well-tried and well established Beurer Safety System in our underblankets and Heating pads. The electric sensor technology prevents overheating in case of misuse by automatic switch-off, securing the highest possible safety. Safe and undisturbed sleep at a pleasant temperature. Weight approx. 1500g Output in watts: 1003-Year Limited Warranty for your peace of mind. Item Number: 40010 (HD 74 LE24 in limited edition black) Stay warm, stay cosy! Beurer German engineering.
