Product	Hollyland Lark M2S Ultimate Combo (White)
SKU	cm-m2s-2
Brand	Hollyland
Category	Audio & Video
Minimum order quantity	1
Unit	—
Unit price	$115.00
Available quantity	0

Description

Unique Pearl Look & Discreet Design Tiny pearl-sized and logo-free design easily conceals the microphone, offering a completely discreet and professional appearance—perfect for live streaming, online teaching, weddings, interviews, and presentations. Weighing just 7 grams, it stays securely clipped to your clothing without sagging or drooping, letting you focus on your performance with style and comfort! Innovative Titanium Clip-on Design With exceptional structural stability and durability, LARK M2S's innovative titanium clip-on design keeps your microphone securely in place, significantly enhancing the comfort and user experience, even during high-intensity activities like sports, cycling, or running. High-Fidelity, Capture Rich Detail Capture rich details with 24-bit/48kHz sampling rate for crystal-clear, natural audio. A 70dB SNR minimizes background noise, while the 116dB SPL ensures low distortion for loud sources. Create professional, true-to-life recordings effortlessly. Noise Cancellation & Long-Range Stability Advanced ENC technology removes low-frequency noise for polished audio. Easily adjust 2 noise cancellation levels via the LarkSound App. With a 300m (1000ft) MAX range and RF interference-resistant circuit, it provides stable, pristine sound quality even in signal-dense locations like event venues and busy urban areas. 30H Long Battery Power Enjoy 9 hours of working time per transmitter/receiver (noise cancellation off) with a quick 1.5-hour recharge. The charging case adds 2.5 full charges, delivering up to 30 hours of total battery life (Lark M2 Mobile Version 27H) to keep you powered for all-day creativity and productivity. Universally Compatible, Effortlessly Flexible LARK M2S works with cameras, audio equipment, iOS/Android devices, and Windows/Mac computers via 3.5mm analog and USB-C digital outputs. Enjoy plug-and-play recording on mobile devices with no need to unplug for playback—perfect for vlogger, creators, on the go!
