Description

The 360° ring stand folds flat for a slim, comfortable feel, and opens to support your phone at multiple angles or provide a secure grip. The stand rotates smoothly with a soft clicking sound for a satisfying, stress-relieving feel. Built-in 12N magnets hold strong and work perfectly with MagSafe — more stable, more efficient charging. Shock-absorbing materials and structure help cushion impacts and protect your iPhone from drops. The built-in capture button (camera button) cover offers full protection and a smooth press for quick, easy shooting. Model PC-1871
