Product	Soundcore AeroClip Open-Ear Earbuds (Champagne Mist)
SKU	cm-A3388H21
Brand	Soundcore
Category	Audio & Video
Minimum order quantity	1
Unit	—
Unit price	\$89.00
Available quantity	100

Description

Soundcore AeroClip Open-Ear Clip-On Earbuds The Soundcore AeroClip is designed for users who want comfortable open-ear listening without pressure inside the ear canal. Its strongest selling point is not just the clip-on design. The real advantage is the balance between open-ear comfort, secure flexible fit, stronger bass tuning, and AI-enhanced call clarity. This makes it a strong option for outdoor use, commuting, workouts, and all-day casual listening.

Key Features

- Open-ear clip-on earbud design
- Pressure-free listening comfort
- Adaptive open-ring structure
- Flexible build tested for 20,000 bends
- Lightweight secure fit
- 12mm × 12mm titanium-coated driver
- Virtual bass technology
- 4 beamforming microphones
- AI-enhanced call clarity
- Wind-blocking mic mesh
- Stylish design available in multiple colors

Comfort & Fit

Open-Ear Clip-On Design The AeroClip avoids deep in-ear pressure by sitting outside the ear canal, making it more comfortable for users who dislike silicone ear tips.

Adaptive Open-Ring Fit The flexible open-ring structure helps the earbuds stay secure while remaining comfortable for long wear.

Durability of Fit The design is built to withstand up to 20,000 bends, which supports repeated daily use and better long-term flexibility.

Audio Performance

- 12mm × 12mm Titanium-Coated Driver** The driver is designed to deliver clear sound with improved detail and stronger audio presence for an open-ear earbud.
- Virtual Bass Technology** Soundcore’s virtual bass tuning helps improve low-end performance, which is important because open-ear earbuds usually struggle with bass compared to sealed in-ear models.

Calls & Microphones

- 4 Beamforming Microphones** The AeroClip uses four microphones to focus on voice pickup during calls.
- AI-Boosted Call Clarity** AI processing helps reduce background noise and improve voice clarity in busy environments.
- Wind-Blocking Mesh** The wind-blocking mic mesh helps improve outdoor call quality, especially while walking or commuting.

Design

Stylish Clip-On Look The AeroClip is designed to work as both an audio accessory and a wearable style piece.

Color Options Available in three vibrant looks, making it more fashion-focused than basic earbuds.

Technical Specifications

- Product Type** Open-ear clip-on wireless earbuds
- Fit Type** Clip-on open-ear
- Driver** 12mm × 12mm titanium-coated driver
- Microphones** 4 beamforming microphones
- Call Technology** AI-enhanced call clarity
