## Description

360 ° voice capture 4 integrated SoundPEATS PureVoice microphones in a 360 ° array to pick up voice from all directions and make sure everyone is heard clearly, perfect for a meeting room that can accommodate 5-10 people. Intelligent Voice Enhancement Voice volume is automatically balanced according to the distance between your voice and the SoundPEATS PureVoice conference speaker. Nobody sounds too close or too far from the SoundPEATS PureVoice conference speaker, so listeners can really focus on what is being said. Intelligent Acoustic Echo Cancellation and Noise SoundPEATS PureVoice has adopted an intelligent artificial intelligence algorithm and intelligent acoustic echo cancellation design to effectively reduce background noise and acoustic echo and transmit optimized clarity and volume. The conference microphone allows users to enjoy a high quality conference experience anytime, anywhere with no restrictions. Multi-person and mute modes SoundPEATS PureVoice supports both sides of the meeting to speak at the same time without delay. And the silent mode helps protect your privacy, you can turn off the microphone whenever you want. Perfect for conference calling The SoundPEATS PureVoice speakerphone can be easily connected to your phone via Bluetooth or to your computer with a USB-C cable and its compact and portable design makes it easy to put the SoundPEATS PureVoice Bluetooth conference speakerphone or carrying case in your pocket
