Product	insta360 X5 Invisible Dive Case
SKU	cm-CAAINS61090
Brand	Insta360
Category	Camera & Photo
Minimum order quantity	1
Unit	—
Unit price	\$115.00
Available quantity	0

Description

Completely invisible when shooting 360° video. Seamless underwater stitching. Waterproof down to 60m (197ft). Capture crystal-clear 360° video with zero distortion. Use with the Invisible Selfie Stick for epic third-person views. The new quick-dry Storage Bag is usable both on land and underwater, protects your Dive Case from bumps and scratches and can be attached to a Buoyancy Control Device (BCD) Compatibility X5 Invisible Dive Case Dive in. Capture it all. Truly invisible 360° underwater footage. Our class-leading invisible Dive Case is back! Get perfect 360° shots underwater with no blind spots. Seamless perfection. Snap in your X5, dive in and capture crystal-clear 360° footage. The custom dome design eliminates distortion no matter how deep you go. Go deeper than ever. Improved design—keep recording as deep as 197ft (60m). Comes standard with the new underwater Storage Bag. The new quick-dry Storage Bag is usable both on land and underwater, protects your Dive Case from bumps and scratches and can be attached to a Buoyancy Control Device (BCD). Built by Insta360. Tested for the deep. Rigorously tested for optical clarity and durability so you can dive with total confidence. Notes Do not open the Dive Case while it is wet. After using the Invisible Dive Case in saltwater, clean it as follows: Remove the camera and securely close the Dive Case. Soak the case in fresh water for 5–10 minutes to prevent residual salt from crystallizing in gaps. These salt crystals will not dissolve in water and can lift the rubber seal and cause water leakage. Rinse gently under a faucet. Never apply a strong water stream from a single direction, as it may cause water leakage. After washing, wipe away any water droplets remaining on the surface with a soft, dry cloth and leave to dry. Ensure there is no sand on the Dive Case before wiping, as sand may scratch the surface when wiped with a cloth. Do not dry with a hair dryer or any other heat source as it may damage the Dive Case. Do not clean the Dive Case with soapy water, neutral detergents, alcohol, or organic solvents (such as thinner or gasoline), as this may degrade its waterproof performance. To prevent discoloration or staining of the Dive Case, avoid contact with cosmetic products such as sunscreen, foundation, and hand cream. Do not store the Dive Case in a hot or humid environment. In particular, avoid leaving it inside a hot car. Store the case in a dry, well-ventilated location.
