Product	Xiaomi Smart Projector L1 Pro
SKU	cm-Xiaomi Smart Projector L1 Pro
Brand	Xiaomi
Category	Camera & Photo
Minimum order quantity	1
Unit	—
Unit price	\$435.00
Available quantity	0

Description

Xiaomi Smart Projector L1 Pro The Xiaomi Smart Projector L1 Pro is designed for users who want a compact smart projector with better brightness, easier setup, and built-in Google TV entertainment. Its strongest selling point is not just Full HD resolution. The real advantage is the combination of Google TV, 400 ISO lumens brightness, auto-focus, automatic keystone correction, and Dolby Audio. This makes it a strong option for bedroom cinema, apartment entertainment, casual movie nights, and streaming without needing an extra TV box. Key Features Google TV built in 1920 × 1080P Full HD resolution 400 ISO lumens brightness Supports 40" to 120" projection size Fully sealed optical engine Smart auto-focus Fully automatic keystone correction Dual speakers Dolby Audio support 2GB DDR3 RAM 16GB eMMC storage Bluetooth and Wi-Fi connectivity Display Performance Full HD Resolution The projector outputs 1920 × 1080P resolution, giving a clear viewing experience for movies, series, YouTube, sports, and casual gaming. 400 ISO Lumens Brightness The 400 ISO lumens brightness is a major upgrade over lower-brightness compact projectors. It improves visibility, image clarity, and overall usability in dim rooms. Important Reality This is still best used in darker or controlled-light rooms. Projectors always lose image quality in bright daylight or strong room lighting. Screen Size Projection Range Supports screen sizes from 40" to 120". Best Practical Range For the best balance between brightness and image size, most users should stay around 60" to 100" unless the room is very dark. Smart TV Experience Google TV Built In Google TV gives users access to streaming apps and content recommendations directly from the projector. Real Buyer Benefit Users do not need an external Android box, Chromecast, or TV stick for most streaming needs. Auto Setup Features Smart Auto-Focus Auto-focus helps the image become clear quickly without manual adjustment. Automatic Keystone Correction Fully automatic keystone correction helps align the image when the projector is placed at an angle. Why This Matters Setup simplicity is one of the biggest reasons users choose smart projectors. The easier the projector is to align, the more often people actually use it. Optical Engine Fully Sealed Optical Engine The sealed optical engine helps reduce dust entry inside the projector, supporting more stable long-term image performance. Audio Experience Dual Speakers Built-in dual speakers provide convenient sound for casual viewing. Dolby Audio Dolby Audio support improves the entertainment experience compared to basic projector speakers. Expectation Check For bigger rooms or stronger movie immersion, an external speaker or soundbar will still improve the experience. Hardware & Connectivity Memory and Storage 2GB DDR3 RAM and 16GB eMMC storage support the smart operating system and app usage. Wireless Connectivity Bluetooth and Wi-Fi allow easier connection to wireless devices and streaming services.
