Description

Samsung Galaxy Buds Core The Samsung Galaxy Buds Core are designed for users who want comfortable true wireless earbuds with strong sound, Active Noise Cancellation, clear calls, and long battery life for everyday use. With silicone wingtips, Bluetooth 5.4, 3 microphones, bold bass, balanced audio, Galaxy AI support, and up to 35 hours of playtime, they are a practical choice for music, calls, podcasts, commuting, workouts, and daily Samsung Galaxy users. Key Features All-Day Comfortable FitSilicone wingtips help keep the earbuds secure while reducing pressure during long listening sessions. Active Noise CancellationReduces unnecessary background noise so users can focus on music, podcasts, calls, or videos. Bold Bass & Balanced SoundDelivers powerful audio with strong bass and clear overall sound for everyday entertainment. 3 Microphones for Clear CallsThree microphones work together to capture your voice more clearly during calls. 35 Hours Total PlaytimeLong battery life keeps your music, calls, and podcasts ready throughout the day. Bluetooth 5.4 ConnectivityProvides modern wireless connection for stable everyday use. Simple Touch ControlTap the earbuds to pause or play music without taking your smartphone out. Galaxy AI SupportEnhances the Samsung Galaxy experience with supported AI features such as Live Translate. Secure Fit for MovementSuitable for daily activity, walking, jogging, commuting, and casual workouts. Samsung Ecosystem FriendlyA strong option for Galaxy smartphone users who want easy pairing and smart feature support.
